

"Indian Air Navigation Services Initiatives"

Shri V.P. Agrawal, Chairman AAI while showering praise on the ANS team remarked "Kudos to the ANS team for winning back to back International ATC Awards. The awards vindicate our growing stature as a major ANSP in the region. We will continue to strive harder to provide world class Air Navigation Services in the country and serve the Aviation Industry with pride and passion".

Mr. V. Somasundaram, Member (Air Navigation Services) observed, "It is a moment of pride and happiness for us that our ANS achievements have deservedly won us the ATC Global Awards 2013. We are committed to take Air Navigation Services to greater height and forge ahead as a world leader among ANSPs."

INTERNATIONAL RECOGNITION

JANE's International ATC Award 2012

The Janes' International ATC Award in the operational category has been conferred on AAI amidst stiff international competition. The entry for the award focused on Chennai FIR Upper Airspace Harmonization Program that has achieved significant benefits in terms of reduced flying time, fuel savings and reduction in emission.

Strategic Advancement Enhancement Award 2013

The award for the INSPIRE (Indian Ocean Strategic Partnership to Reduce Emissions) is in recognition of India's ANS initiatives and commitment to the cause, for improving the environmental efficiency and sustainable aviation across the Indian Ocean and Arabian Sea region.

Excellence in ANSP Management Award 2013

The award for ANSP Excellence for "Cruising ahead with excellence in ANS" is a tribute for the significant ANS initiatives taken by AAI towards improved operational efficiency and safety through upper airspace harmonization, implementation of RNAV routes, reduction in separation on major routes based on enhanced seamless Radar coverage, continuous descent operations, progress in GAGAN etc.

The coveted ATC Global Awards for AAI for 2013 following the last year's Jane's International ATC Award 2012 are a standing testimony for AAI's continuing excellence in ANS, meeting the objectives of safe & efficient aircraft operations and environmental protection in the region.
