

AIRPORTS AUTHORITY OF INDIA

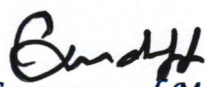

ENVIRONMENT POLICY

Airports Authority of India (AAI) being the sole Air Navigation Service (ANS) provider and operator of majority of Indian Airports is consistently and continuously honoring Corporate and Social Responsibility (CSR) and is committed for reduction of Green House Gas (GHG) and sustainable development by implementing cost effective carbon mitigation action to conserve environment and reduce adverse impact on society, community and ecosystem, thus contributing to national sustainable development goals.

As a part of this policy, AAI top management is conscious and committed to sensitize all employees and stakeholders to fulfill environment obligation by reducing carbon footprints and commitment by:-

- Improvement in energy efficiency, maximizing the usages of green and renewable energy resources.*
- Implementing / adopting best air traffic management facilities, practices and procedures.*
- Ensuring judicious use of natural resources and target setting for improvement of environment by mitigating emissions, solid waste generation and reducing the consumption of energy and water.*
- Implementing green building concept and usages of eco-friendly biodegradable products in design, construction and facilitation.*
- Promoting green supply chain to the utmost extent possible.*
- Documenting and quantifying the GHG resources and mitigating carbon footprints by adopting best and technologically advanced procedures and practices.*
- Directing, educating, sensitizing, motivating and impart training to all employees and stakeholders to enable them to understand desired behavior towards environment health.*
- Fulfilling all applicable environmental compliance obligations.*

AAI is dedicated for upholding this policy with responsibility and will review periodically in-line with emerging requirements and practices.

(Dr. Guruprasad Mohapatra)
Chairman, AAI
