

✈ भोपाल विमानतल पर दिनांक 23.05.2026 (देर रात्रि) / 24.05.2026 (प्रातःकाल) को नियमित एयरसाइड रखरखाव गतिविधियों के अंतर्गत रनवे रबर रिमूवल कार्य किया गया।

यह महत्वपूर्ण प्रक्रिया विमान संचालन हेतु रनवे की सुरक्षित एवं बेहतर सतह स्थिति बनाए रखने में सहायक होती है। ✈ 🗺

✈ On 23.05.2026 (late night) / 24.05.2026 (early morning), runway rubber removal work was carried out at Bhopal Airport as part of routine airside maintenance activities.

This important process helps in maintaining a safe and better surface condition of the runway for aircraft operations. ✈ 🗺

RUNWAY RUBBER REMOVAL ACTIVITY CONDUCTED AT BHOPAL AIRPORT

Raja Bhoj Airport, Bhopal

To Enhance Operational Safety

Why Rubber Removal?

During aircraft landings, tyre rubber deposits gradually accumulate in the touchdown zone of the runway.

Why It Matters?

Periodic removal restores runway surface texture and maintains desired braking efficiency, particularly during wet weather conditions, enhancing aircraft ground handling performance and overall operational safety.

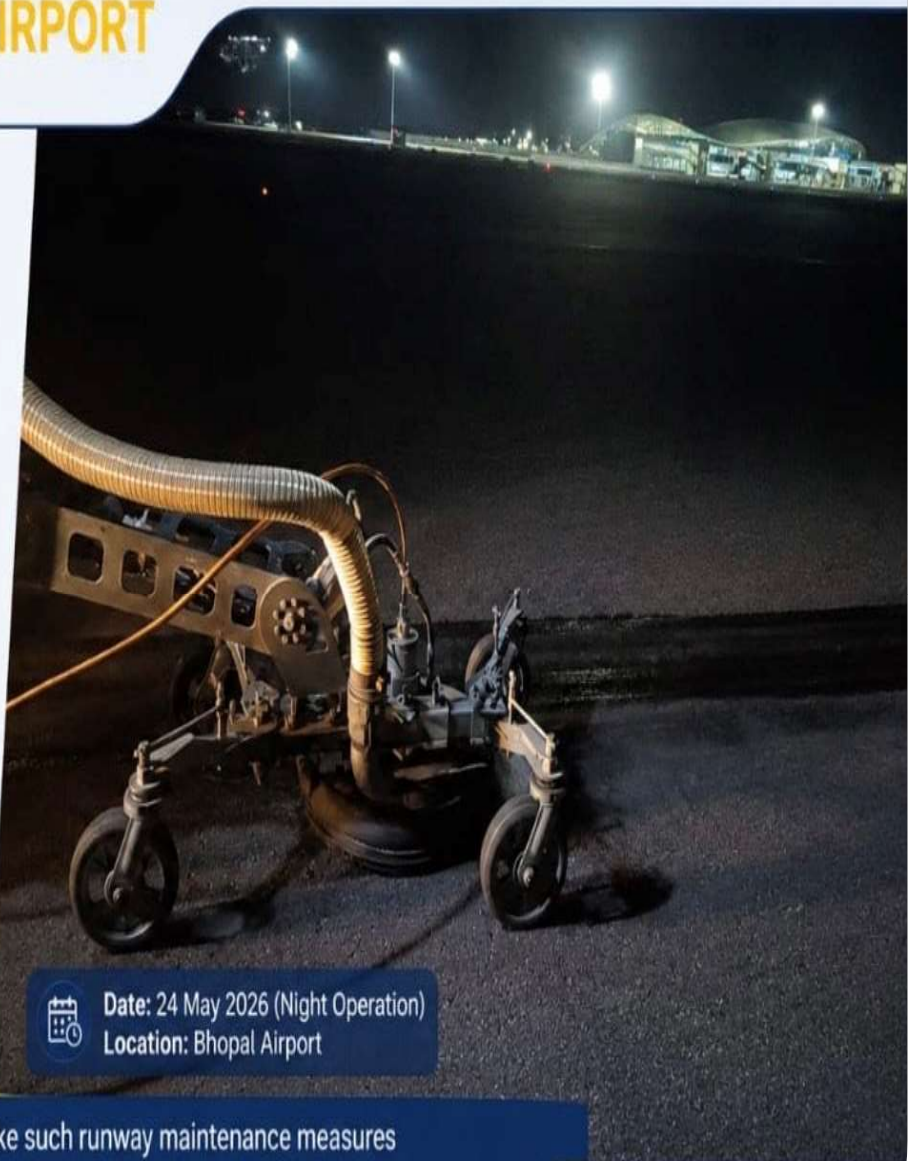

How It's Done?

Specialized equipment is used to safely remove accumulated rubber deposits while maintaining runway pavement integrity.

Planned & Executed with Care

The activity was carried out during low-traffic night hours to minimize any impact on flight operations.

Date: 24 May 2026 (Night Operation)
Location: Bhopal Airport

Airports across the world periodically undertake such runway maintenance measures as part of standard safety practices.

Bhopal Airport remains committed to maintaining the highest standards of safety, operational efficiency, and passenger service.
