

Catch some sleep on the go.

Chennai Airport, 17.08.2022: Passengers arriving at Chennai Airport can now have a comfortable short stay with the launch of Sleeping Pod facility (capsule hotel) in Domestic Arrival (near baggage belt no 1), today. This facility titled 'Sleepszoo' with 04 bed sized capsules will greatly benefit transit passengers awaiting their connecting flights and will provide the much needed short time rest on the go.

Frequent flyers spend so much time for travel and it's very important to get the rest wherever they can. The best option would be to walk into a good hotel which may not be possible both because of the time constraints and finances. And if the passenger is particularly short on time, sleeping in airport may be the best option. The sleeping pod facility at Chennai Airport can be availed on hourly basis and have amenities like reading lights, charging station, USB charger, luggage space, ambient light & blower control and a nice plush bed. Each capsule can accommodate one person (and kid, if under 12 years) offering full rest to the tired passenger.

The facility was inaugurated by Dr. Sharad Kumar, Airport Director in presence of AAI officials. Online pre-booking facility will be made available soon.
