

Bhopal Airport is gearing up for implementation of Low Visibility Procedures (LVP) from 27.11.25, training of ATC & operational personnel is underway. All necessary infrastructure & facilities for CAT-II operations (AGL, ILS & MET equipment etc.) are already in place. With the implementation of LVP from 27th November 2025, Bhopal Airport will be able to ensure safe flight operations in RVR conditions as low as 350M & become the first AAI Airport in western & central India to have fully operational CAT-II system.
