

## **AAICLAS calling young aviation aspirants to join as ILHBS security screeners in Chennai International Airport**

**Chennai,19.04.2023:** Airports around the world are embarking on comprehensive and seamless digitalisation of airport environment while embracing technological advancements. Insights gained through customer feedback will be used for future plans and priorities to increase airport capacity by enabling faster passenger flow and throughput, enhancing passenger experience and service levels.

The In-Line Hold Baggage Handling System (ILHBS) – an automated system with multiple levels of security screening – allowing for more efficient check-in process. The in-line baggage system, which equips with scanners, is integrated with the airport Baggage Handling System (BHS) to provide a complete hold baggage processing and screening mechanism at the airport. The in-line baggage system will enable passengers to avoid queue up near the X-ray machines for scanning their baggage before check-in. The latest ILHBS uses latest and superior technology installed across major airports in India, including Chennai International Airport.

### **Baggage Screening/Baggage Screener**

Baggage screening is a crucial step in airports that ensures the safety and security in the airport and the flight. During baggage screening the luggage and items being transported are screened and checked for prohibited items. Baggage screeners utilise modern machines, metal detectors, and other equipment to scan luggage for prohibited items such as weapons, auto detection of explosives, and other dangerous materials. Sometimes even wild

animals and exotic aves are carried by poachers which are found and penalised by them. They also conduct manual inspections of bags when necessary.

Baggage screeners are especially trained to identify potential threats, and they work closely with airport security personnel and law enforcement agencies to ensure that any suspicious items are identified and handled appropriately. Overall, the role of baggage screening personnel is crucial in ensuring the safety and security of air travel, and they play a vital role in protecting passengers and airport staff from potential threats.

### **Work as Security screener at Chennai Airport**

The AAI had mandated its integrated logistics arm AAI Cargo Logistics and Allied Services Company (AAICLAS) to carry out in-line baggage screening at various airports in a phased manner, in compliance with the Bureau of Civil Aviation Security (BCAS) norms for ensuring safe and secure hold baggage screening system.

Now, AAICLAS is inviting the BCAS Certified Security Screeners, who possess valid ILBHS / Standalone X-BIS Screener Certification and Basic AVSEC Certification valid till 30.06.2023. Certification of DG Cat-12 will be an added advantage. The place of posting shall be at Chennai Airport and is an ideal opportunity for young aspirants looking for a headway in aviation.

The applicants last drawn pay will be protected and additional 3% increment shall be paid to the eligible candidate. Joining Bonus of Rs. 20,000 /- is eligible for the applicants joining within 15 days from the date of issue of appointment and the candidates joining immediately on issuance of appointment order will be reimbursed one-month notice period wages, which

are to be compensated with the earlier organization worked, on production of document evidence.

All other terms and conditions shall be as per the Engagement Advertisement No.01/2022, 03/2022 & 03/2023 published in AAICLAS Portal [www.aaiclas.aero](http://www.aaiclas.aero).
