2. **Specific Physical/Mental Examination** shall be based on the following requirements.
  - 2.1 The applicant shall not suffer from any disease or disability which could render that applicant likely to become suddenly unable to perform duties safely.
  - 2.2 The applicant shall have no established medical history or clinical diagnosis of: psychosis, alcoholism, drug dependence, any personality disorder, particularly if severe enough to have repeatedly resulted in overt acts; a mental abnormality, or neurosis of a significant degree. A history of acute toxic psychosis need not be regarded as disqualifying, provided that the applicant has suffered no permanent impairment.
  - 2.3 The applicant shall have no established medical history or clinical diagnosis of any of a progressive or non-progressive disease of the nervous system, epilepsy; any disturbance of consciousness without satisfactory medical explanation of cause; Cases of head injury, the effects of which, are likely to interfere with the routine activity shall be assessed as unfit.
    - 2.3.1 The applicant shall not possess any abnormality of the heart, congenital or acquired. An applicant known to have suffered from myocardial infarction may be assessed as unfit. Systolic and diastolic blood pressures shall be within normal limits (use of drugs for control of high blood pressure is disqualifying).
    - 2.3.2 There shall be no significant functional nor structural abnormality of the circulatory tree. The presence of varicosities does not necessarily entail unfitness.
    - 2.3.3 There shall be no acute disability of the lungs nor any active disease of the structures of the lungs, mediastinum or pleura. Radiography shall form a part of the medical examination in all doubtful clinical cases. Cases of active pulmonary tuberculosis, duly diagnosed, shall be assessed as unfit. Cases of quiescent or healed lesions which are known to be tuberculous, or are presumably tuberculous in origin, may be assessed as fit.
    - 2.3.4 Cases of disabling disease with important impairment of function of the gastrointestinal tract or its adnexae shall be assessed as unfit. The applicant shall be required to be completely free from those hernias that might give rise to incapacitating symptoms. Any sequelae of disease or surgical intervention on any part of the digestive tract or its adnexae, liable to cause incapacity, in particular any obstructions due to stricture or compression shall be assessed as unfit.
    - 2.3.5 Proven cases of diabetes mellitus shown to be satisfactorily controlled without the use of any anti-diabetic drug, may be assessed as fit. The use of anti-diabetic drugs for the control of diabetes mellitus is disqualifying.
    - 2.3.6 Cases of significant localized and generalized enlargement of the lymphatic glands and of diseases of the blood shall be assessed as unfit.
    - 2.3.7 Cases presenting any signs of organic disease of the kidney shall be assessed as unfit. The urine shall contain no abnormal element considered by the medical examiner to be of pathological significance. Cases of affections of the urinary passages and of the genital organs shall be assessed as unfit. Any sequelae of disease or surgical procedures on the kidneys and the urinary tract liable to cause incapacity,

in particular any obstructions due to stricture or compression, shall be assessed as unfit. Compensated nephrectomy without hypertension or uremia may be assessed as fit.

- 2.3.8 An applicant who has a personal history of syphilis shall be required to furnish evidence, satisfactory to the medical examiner, that the applicant has undergone adequate treatment.
- 2.3.9 Applicants who have a history of severe menstrual disturbances that have proved unamenable to treatment shall be assessed as unfit.

Functional after-effects of lesion affecting the bones, joints, muscles or tendons and certain anatomical defects compatible with normal activity may be assessed as fit.
- 2.3.11 There shall be no serious malformation nor serious, acute or chronic affection of the buccal cavity or upper respiratory tract.
- 2.3.12 Cases of speech defects and stuttering shall be assessed as unfit.

Visual acuity should be measured by means of a series of Landolt rings or similar optotypes, placed at a distance from the applicant appropriate to the method of testing adopted.
  - 3.1.1 Distant visual acuity with or without correction shall be 6/9 or better in each eye separately, and binocular visual acuity shall be 6/6 or better. No limits apply to uncorrected visual acuity. Where this standard of visual acuity can be obtained only with correcting lenses, the applicant may be assessed as fit.
  - 3.1.2 Applicants may use contact lenses to meet this requirement provided that the lenses are monofocal and non-tinted; the lenses are well tolerated.
  - 3.1.3 Applicants whose uncorrected distant visual acuity in either eye is worse than 6/60 shall be required to provide a full ophthalmic report (see para 3.6 below). The purpose of the required ophthalmic examination is to ascertain normal vision performance, and to identify any significant pathology.
  - 3.1.4 Applicants who have undergone surgery affecting the refractive status of the eye shall be assessed as unfit unless they are free from those sequelae which are likely to interfere with normal vision.
  - 3.1.5 The applicant shall have the ability to read, while wearing the correcting lenses, if any, required by the N5 chart or its equivalent at a distance selected by that applicant in the range of 30 to 50 cm and the ability to read the N14 chart or its equivalent at a distance of 100 cm.
