Press Release

Airports Authority of India to use best potential of land and properties by making asset documentation a robust and real time process

New Delhi, 31st May, 2019: In order to make asset documentation a robust and real time process, Airports Authority of India (AAI) has signed an agreement with NTrust Infotech – Anarock Consortium on 30th May, 2019 for asset rationalization, lease administration and related services on pan-India basis through cutting edge Lease Administration Technology.

The agreement is signed for a period of 3 years. Speaking on the occasion, Shri S. Suresh, Member (Finance), AAI reiterated that this pact will help AAI in rationalizing its assets thus by making use of best potential of land and properties and making asset documentation a robust and real time process.

Shri Anil Gupta, Executive Director (Land Management & Business Development), Airports Authority of India informed that by engaging NTrust Infotech – Anarock Consortium who are the global industry leaders, specializing in delivery of technology enabled services, will help AAI who is managing 129 airports all across the country in identifying best potential of land asset which in turn will improve revenue stream for AAI. This will also result in bringing transparency, better management control and monitoring of costs for AAI.

AAI is committed towards upgrading itself continuously with best in class system technology and knowledge for streamlining day to day operations bringing higher efficiency and transparency.
