

AIRPORTS AUTHORITY OF INDIA

New Delhi, 8th February, 2013

Reports are coming that there was a Radar failure today at IGI Airport. It is to clarify that there was no radar failure and there was a power failure and switch over from main supply to standby supply lasted for a transition period of 1221 IST to 1231 IST. This is to further clarify that AAI radars are equipped with three levels of power supply, one main and two standbys.

During this period AAI seamlessly continued with the arrival and a few departures were released in a controlled manner.
